

Dash Board

Le Van Hieu

18/07/2022

OUTLINE

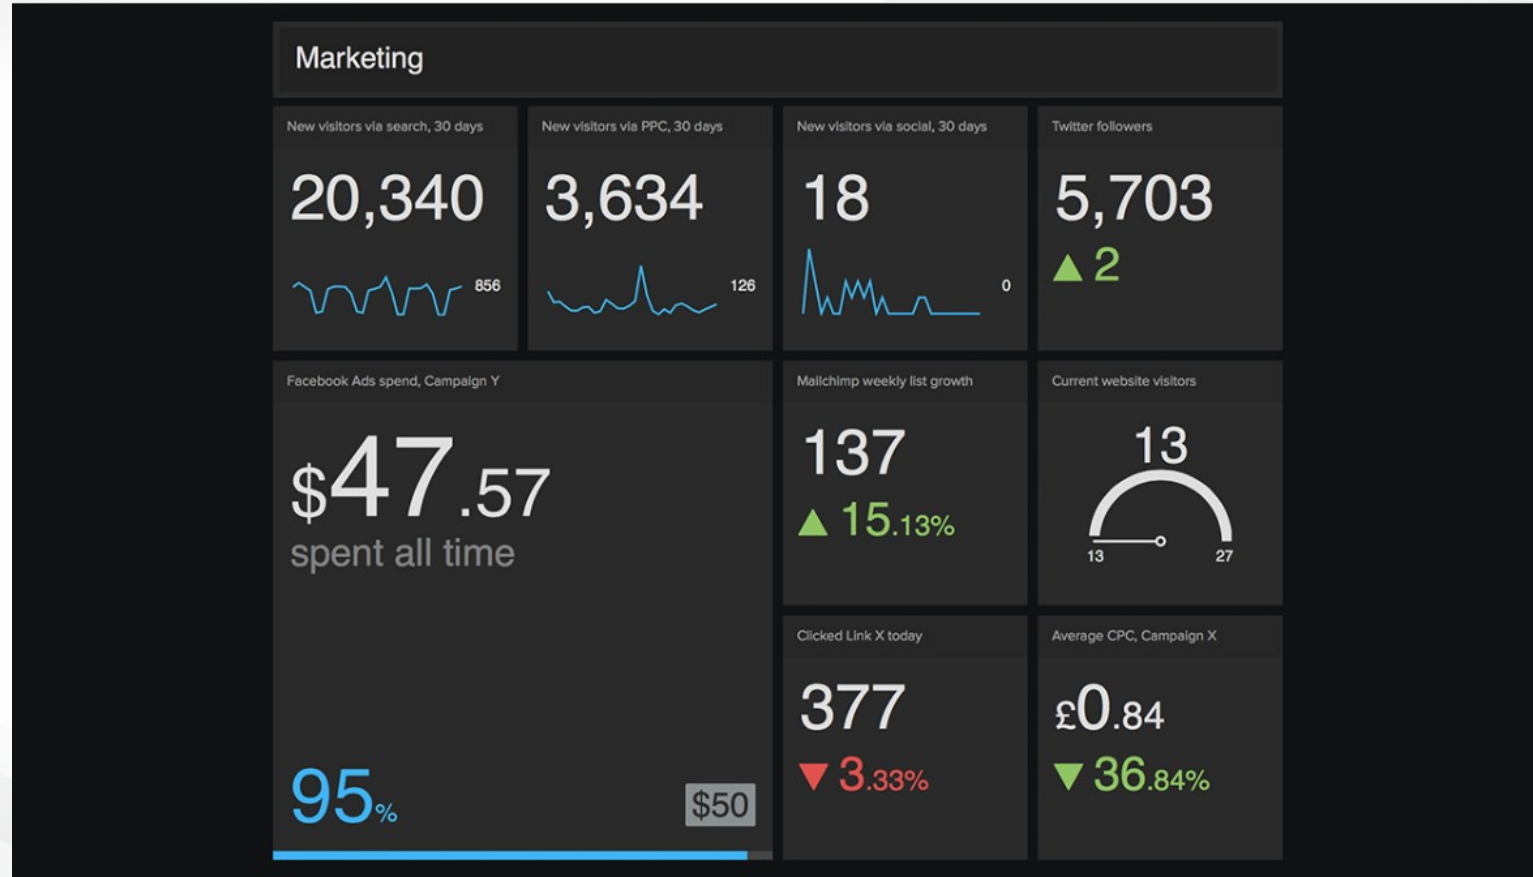

- I. What's a dashboard?**
- II. Introducing flexdashboard**
- III. Dashboard layouts**
- IV. Dashboard components**
- V. Interactive dashboards**
- VI. flexdashboard vs. shinydashboard**
- VII. Example projects**

I. What's a dashboard?

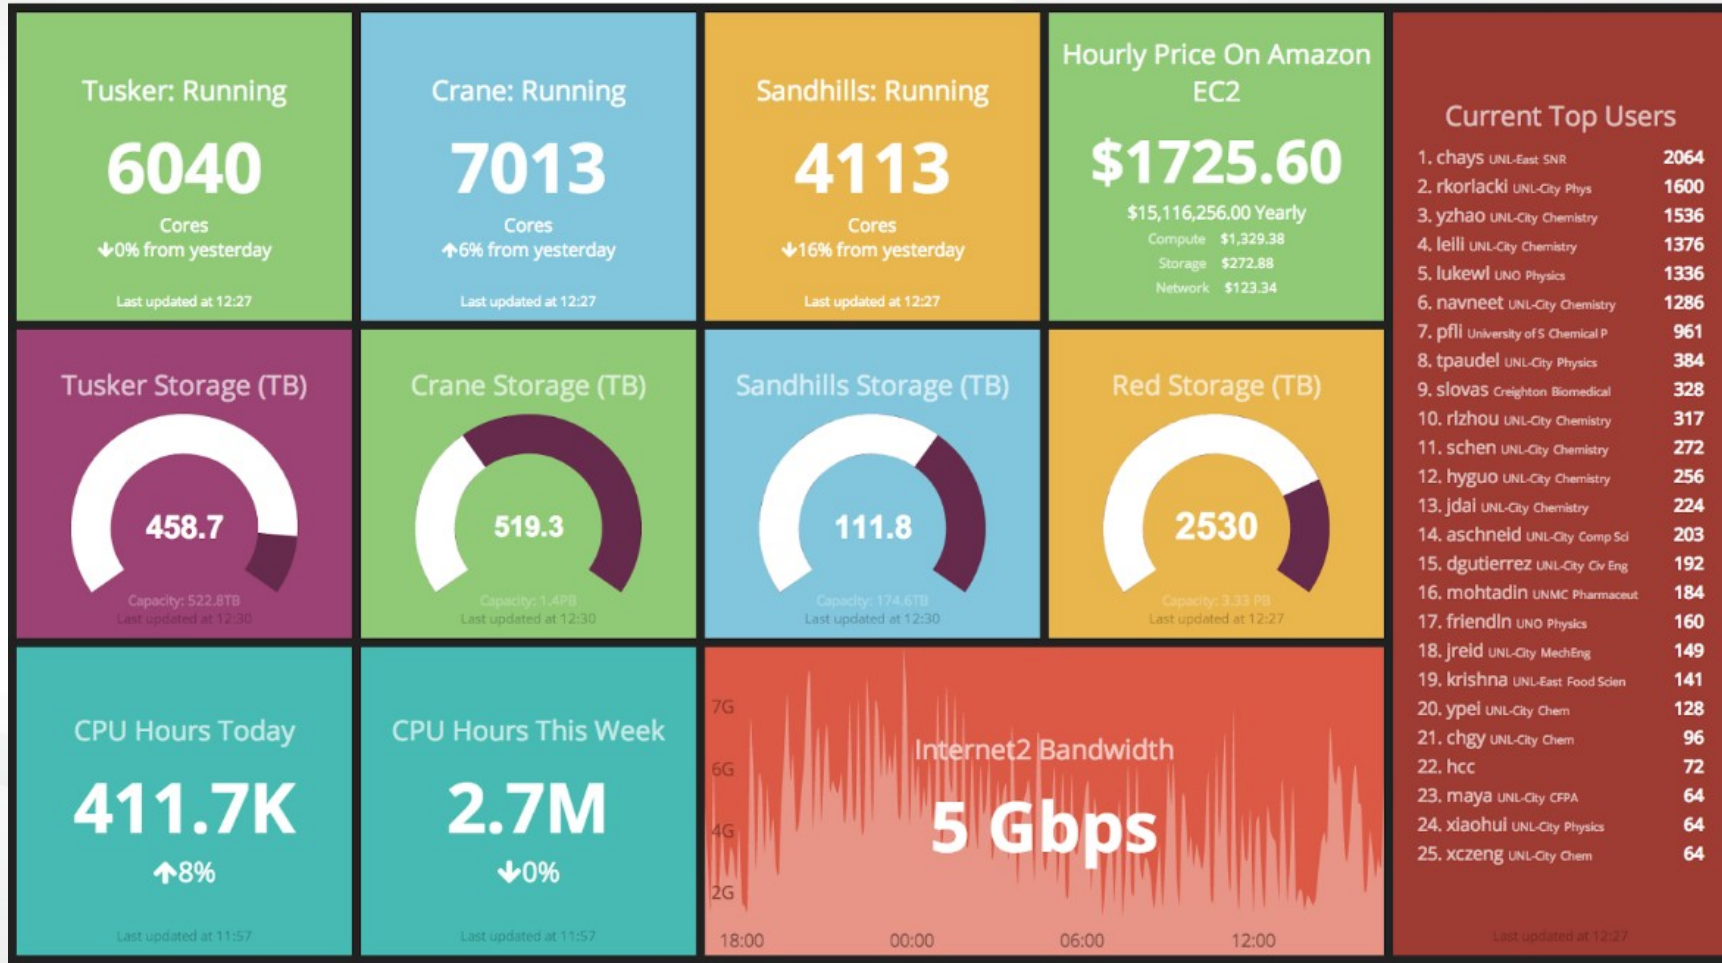

I. What's a dashboard?

This is a dashboard

I. What's a dashboard?

This is a dashboard

I. What's a dashboard?

?????

II. Introducing flexdashboard

- A communications tool showing relevant information about different aspects of a system
- Full-screen, space-consuming layout
- Often via subdivision
- High-level trends and summaries favored over details
- Information designed for quick, glancing consumption

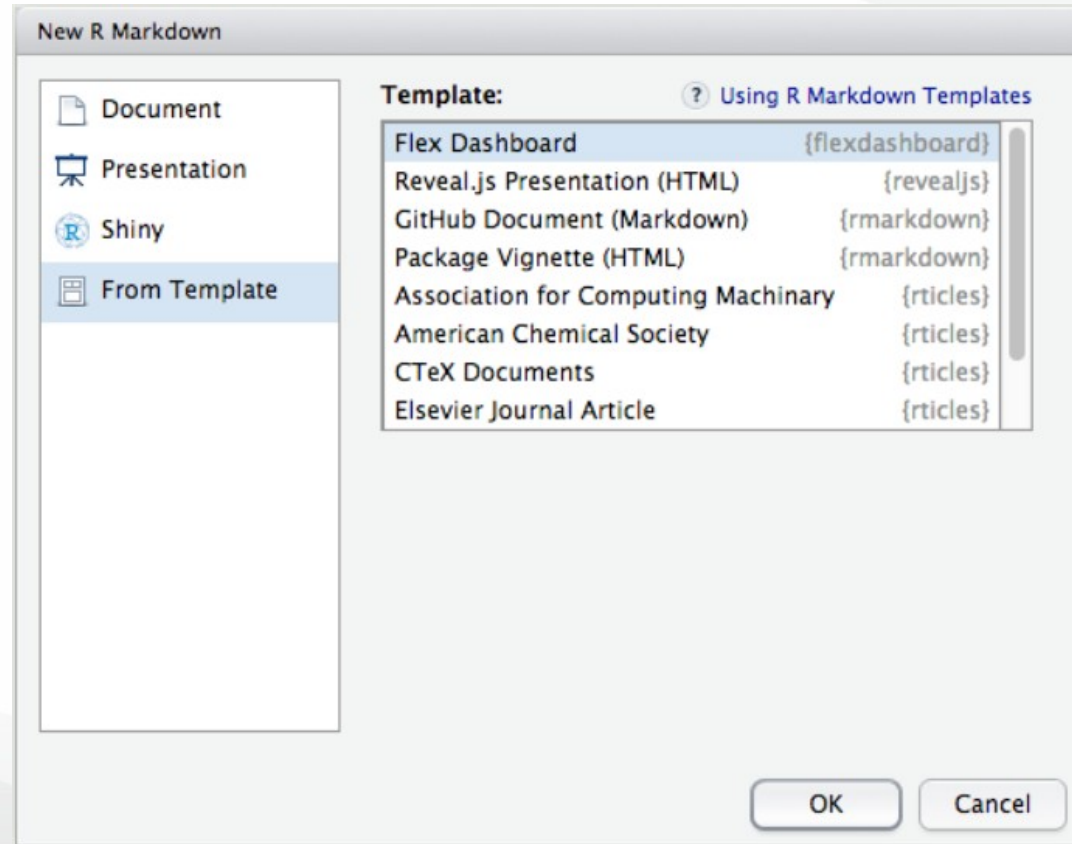

II. Introducing flexdashboard

Installation

```
install.packages("flexdashboard", type = "source")
```

II. Introducing flexdashboard

Via RStudio

II. Introducing flexdashboard

Via the R prompt

```
rmarkdown::draft("dashboard.Rmd",  
                 template = "flex_dashboard",  
                 package = "flexdashboard")
```

III. Dashboard layouts

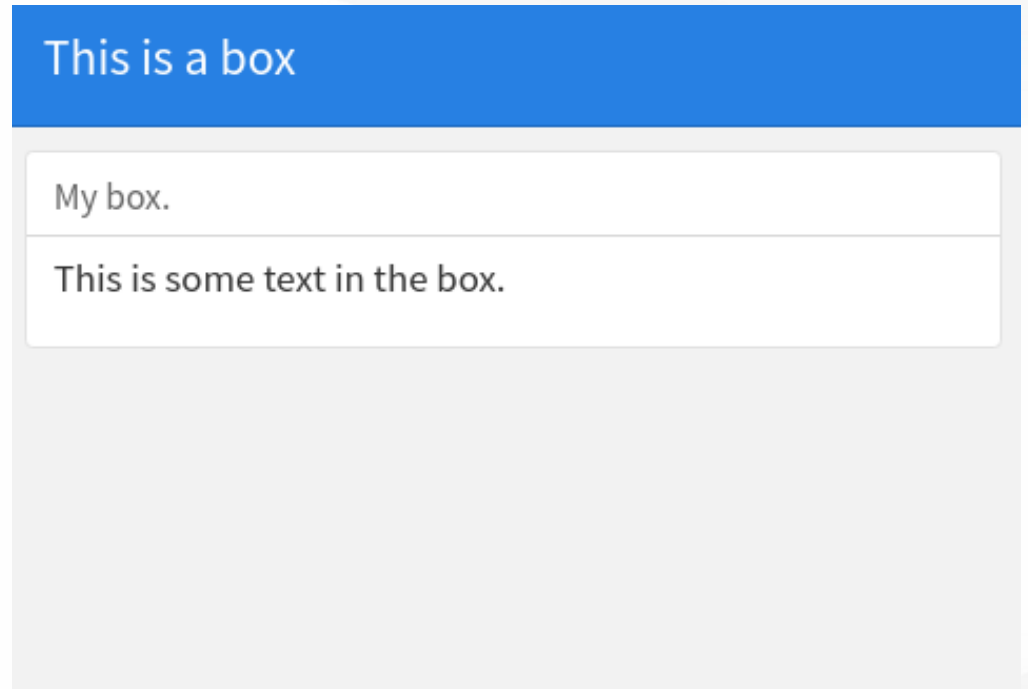

- **The Big Idea**

- Use Markdown headings to describe the boxes and space division of your dashboard
- Layout is implicit and automatic
- Tweakable with custom attributes
- Content in your boxes fills the box automatically
- Supply gaps between R offerings and common dashboard components

III. Dashboard layouts

Level three: boxes.

```
---  
title: "This is a box"  
output:  
  flexdashboard::flex_dashboard  
---  
#### My box.  
  
This is some text in the box.
```

III. Dashboard layouts

Level two: columns

```
---
title: "columns"
output: flexdashboard::flex_dashboard
---
## My first column

### My first box

This is some text in a box.

## My second column

### My second box

This is some slightly different text in a box.
```

columns	
My first box	My second box
This is some text in a box.	This is some slightly different text in a box.

III. Dashboard layouts

Level two: Layout by columns, row

```
---  
title: "Column Orientation"  
output: flexdashboard::flex_dashboard  
---
```

Column

Chart 1

```
```\r}  
```
```

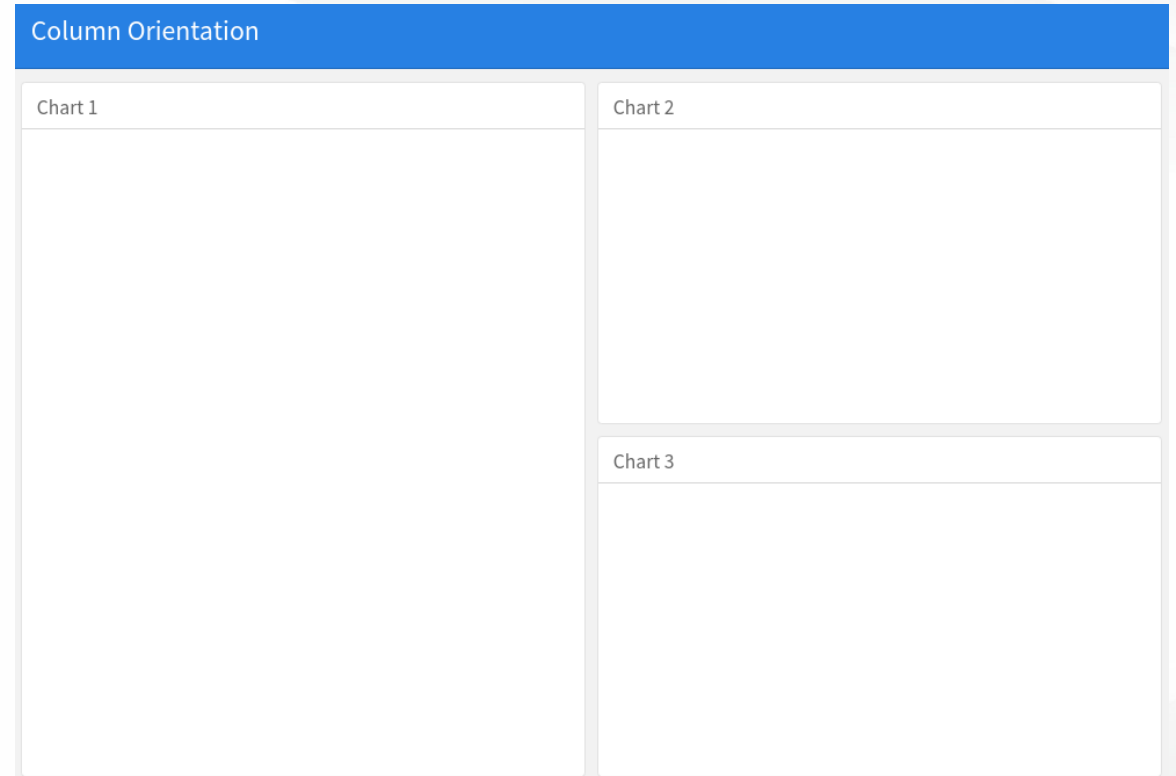

Column

Chart 2

```
```\r}  
```
```

Chart 3

```
```\r}  
```
```

III. Dashboard layouts

Level two: Layout by columns, row

```
---
title: "Row Orientation"
output:
  flexdashboard::flex_dashboard:
    orientation: rows
---
```

Row

Chart 1

```
```{r}
```
```

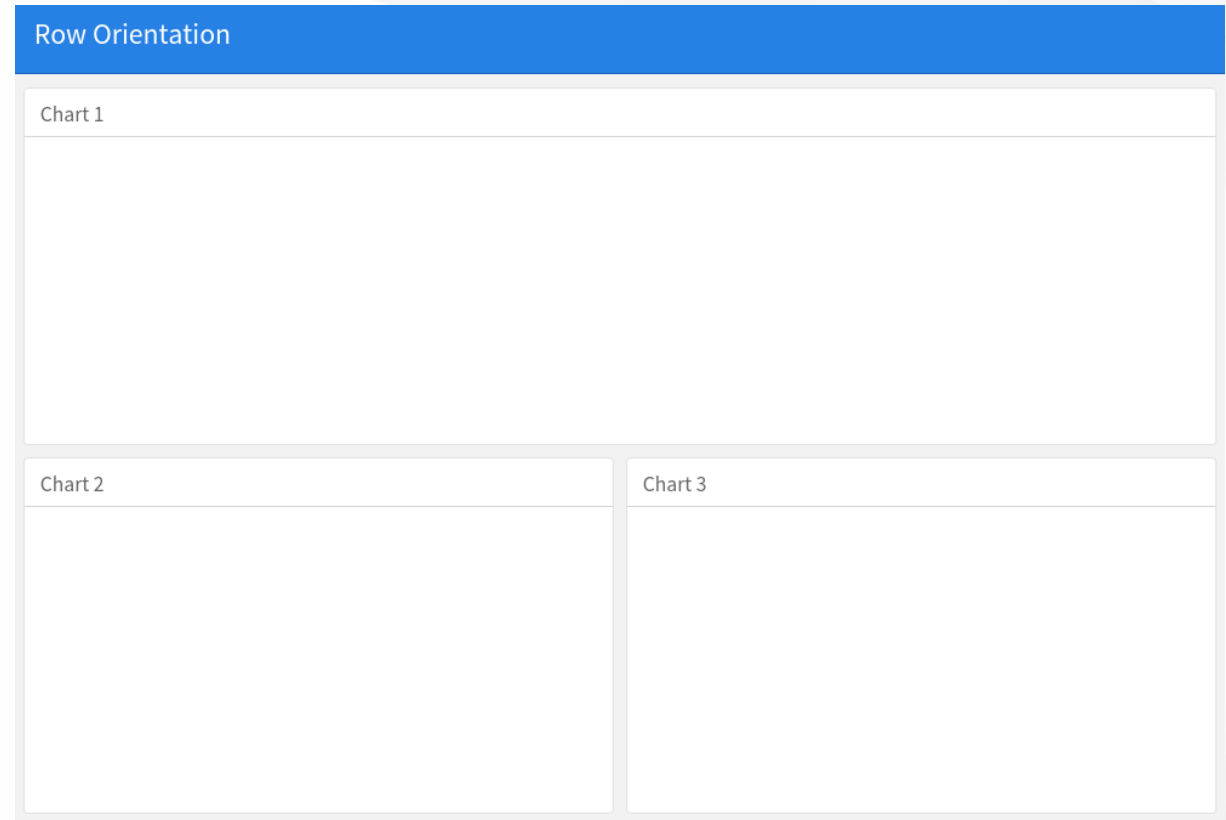

Row

Chart 2

```
```{r}
```
```

Chart 3

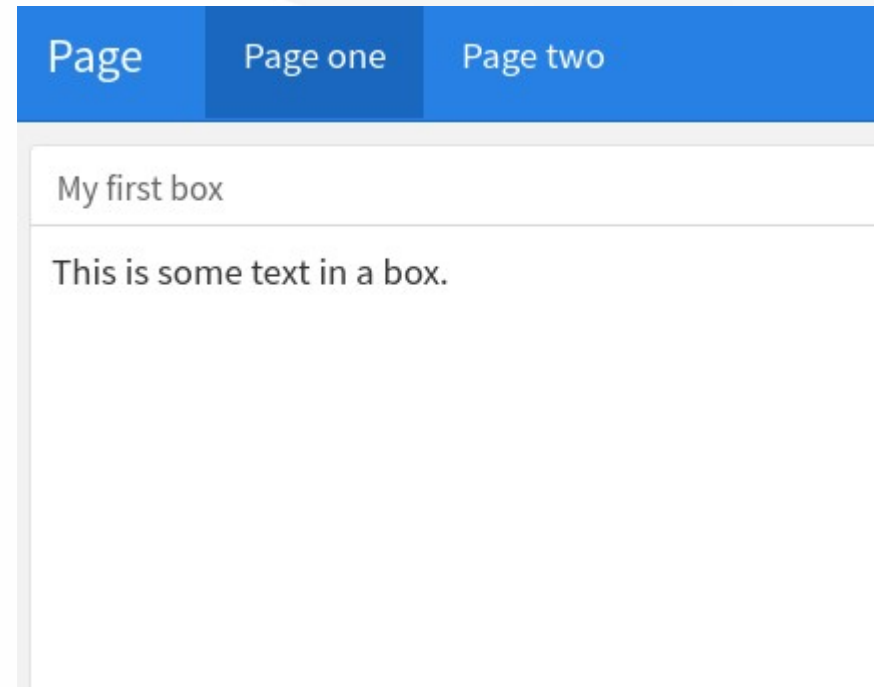

```
```{r}
```
```

III. Dashboard layouts

Level one: pages

```
---  
title: "Page"  
output: flexdashboard::flex_dashboard  
---  
# Page one  
  
### My first box  
  
This is some text in a box.  
  
# Page two  
  
### My second box  
  
This is some slightly different text in a box.
```

III. Dashboard layouts

- **Layout Recap:**

- Use Markdown headings to describe the boxes and space division of your dashboard
- Layout is implicit and automatic
- Tweakable with custom attributes
- Content in your boxes fills the box automatically
- Supply gaps between R offerings and common dashboard components

IV. Dashboard components

- **Value boxes**

```
library(flexdashboard)
articles <- 204
valueBox(articles,
  icon = "fa-pencil",
  caption = "Articles per Day")
```

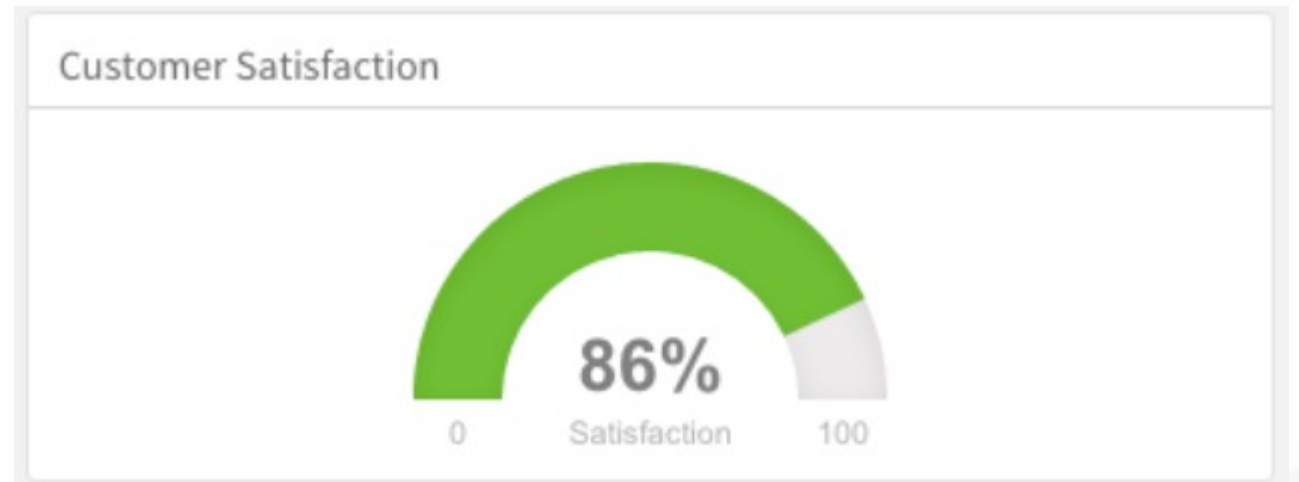

<https://bookdown.org/yihui/rmarkdown/dashboard-components.html#value-boxes>

<https://fontawesome.com/v4/icons/>

IV. Dashboard components

Gauges

```
satisfaction <- 86  
gauge(satisfaction, min = 0, max = 100, symbol  
= '%',  
  label = "Satisfaction", gaugeSectors(  
    success = c(80, 100), warning = c(40, 79),  
    danger = c(0, 39)  
  ))
```

<https://bookdown.org/yihui/rmarkdown/dashboard-components.html#gauges>

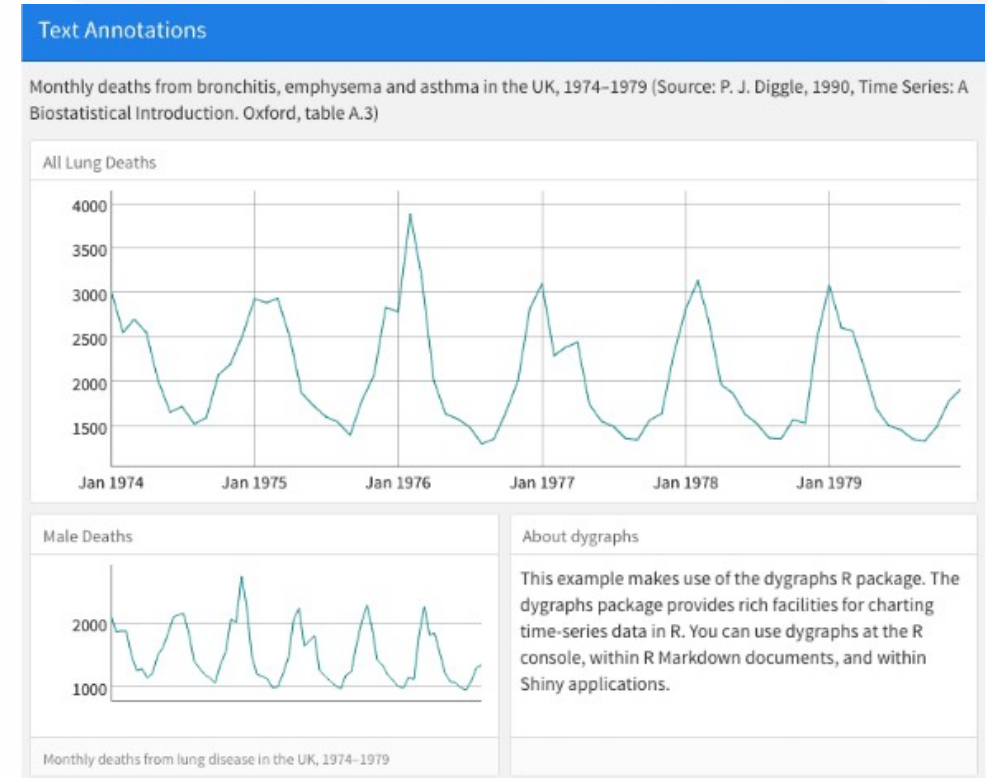

IV. Dashboard components

Text Annotations

Each component within a dashboard includes optional title, which is the text following the level 3 heading ###

Notes are any text prefaced with > after the code chunk that yields the component's output, like:

> Monthly deaths from lung disease in the UK, 1974–1979...

IV. Dashboard components

Navigation Bar

```
---  
title: "Navigation Bar"  
output:  
  flexdashboard::flex_dashboard:  
    navbar:  
      - { title: "About", href: "https://example.com/about" }  
---
```

```
---  
title: "Source Code"  
output:  
  flexdashboard::flex_dashboard:  
    source_code: embed  
---
```

<https://bookdown.org/yihui/rmarkdown/dashboard-components.html#navigation-bar>

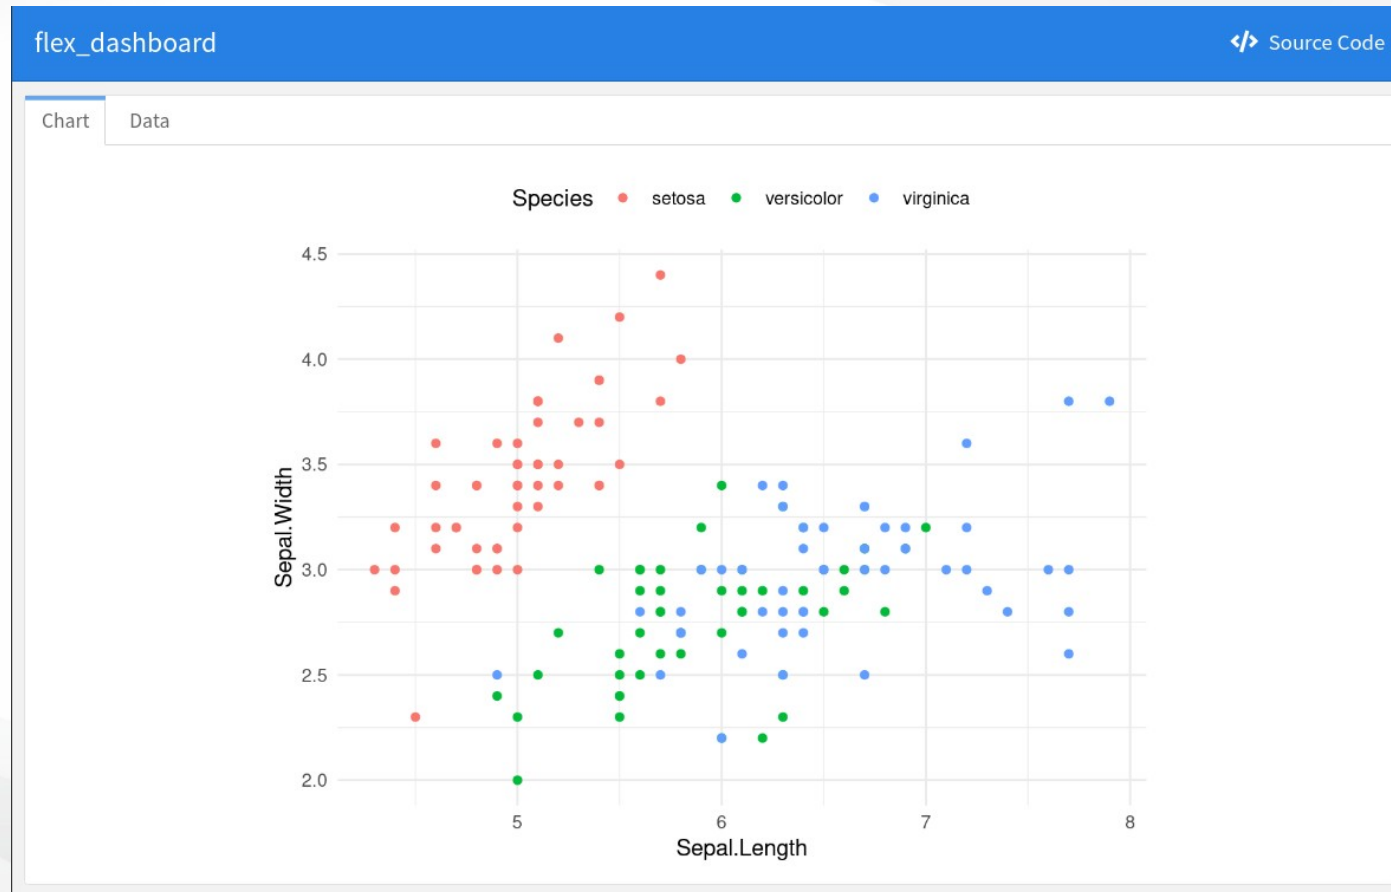

IV. Dashboard components

Including Data: tabsets

```
---  
title: "flex_dashboard"  
output:  
  flexdashboard::flex_dashboard:  
    source_code: embed  
---  
  
## Column {.tabset}  
  
### Chart  
  
``{r}  
library("ggplot2")  
sp <- ggplot(iris, aes(Sepal.Length, Sepal.Width)) +  
  geom_point(aes(color = Species)) +  
  theme_minimal()+  
  theme(legend.position = "top")  
sp  
``  
  
### Data  
  
``{r}  
knitr::kable(iris)  
``
```

IV. Dashboard components

- Including Data: Chart

IV. Dashboard components

Including Data: Table

flex_dashboard [Source Code](#)

| Chart | Data | | | |
|--------------|-------------|--------------|-------------|---------|
| Sepal.Length | Sepal.Width | Petal.Length | Petal.Width | Species |
| 5.1 | 3.5 | 1.4 | 0.2 | setosa |
| 4.9 | 3.0 | 1.4 | 0.2 | setosa |
| 4.7 | 3.2 | 1.3 | 0.2 | setosa |
| 4.6 | 3.1 | 1.5 | 0.2 | setosa |
| 5.0 | 3.6 | 1.4 | 0.2 | setosa |
| 5.4 | 3.9 | 1.7 | 0.4 | setosa |
| 4.6 | 3.4 | 1.4 | 0.3 | setosa |
| 5.0 | 3.4 | 1.5 | 0.2 | setosa |
| 4.4 | 2.9 | 1.4 | 0.2 | setosa |
| 4.9 | 3.1 | 1.5 | 0.1 | setosa |
| 5.4 | 3.7 | 1.5 | 0.2 | setosa |
| 4.8 | 3.4 | 1.6 | 0.2 | setosa |
| 4.8 | 3.0 | 1.4 | 0.1 | setosa |
| 4.3 | 3.0 | 1.1 | 0.1 | setosa |
| 5.8 | 4.0 | 1.2 | 0.2 | setosa |

V. Interactive dashboards

- **Interactivity with HTML widgets**

<https://www.htmlwidgets.org/>

- Simplest form of interactivity
- Static HTML; no special client or server requirements
 - Host anywhere, view anywhere
- Data must be fixed (can't run R code)
- Interaction can happen across widgets with [crosstalk](#)

V. Interactive dashboards

```
library(dygraphs)
lungDeaths <- cbind(mdeaths, fdeaths)
dygraph(lungDeaths) %>%
  dyRangeSelector()
```

V. Interactive dashboards

```
library(DT)
datatable(iris, options = list(pageLength = 5))
```

Show **5** entries Search:

| | Sepal.Length | Sepal.Width | Petal.Length | Petal.Width | Species |
|---|--------------|-------------|--------------|-------------|---------|
| 1 | 5.1 | 3.5 | 1.4 | 0.2 | setosa |
| 2 | 4.9 | 3 | 1.4 | 0.2 | setosa |
| 3 | 4.7 | 3.2 | 1.3 | 0.2 | setosa |
| 4 | 4.6 | 3.1 | 1.5 | 0.2 | setosa |
| 5 | 5 | 3.6 | 1.4 | 0.2 | setosa |

Showing 1 to 5 of 150 entries

Previous **1** 2 3 4 5 ... 30 Next

V. Interactive dashboards

```
---
title: "dashboard"
output:
  flexdashboard::flex_dashboard:
    source_code: embed
---
```

Column

Chart 1

```
`r`
```

```
library(dygraphs)
lungDeaths <- cbind(mdeaths, fdeaths)
dygraph(lungDeaths) %>%
  dyRangeSelector()
`r`
```

Column

Chart 2

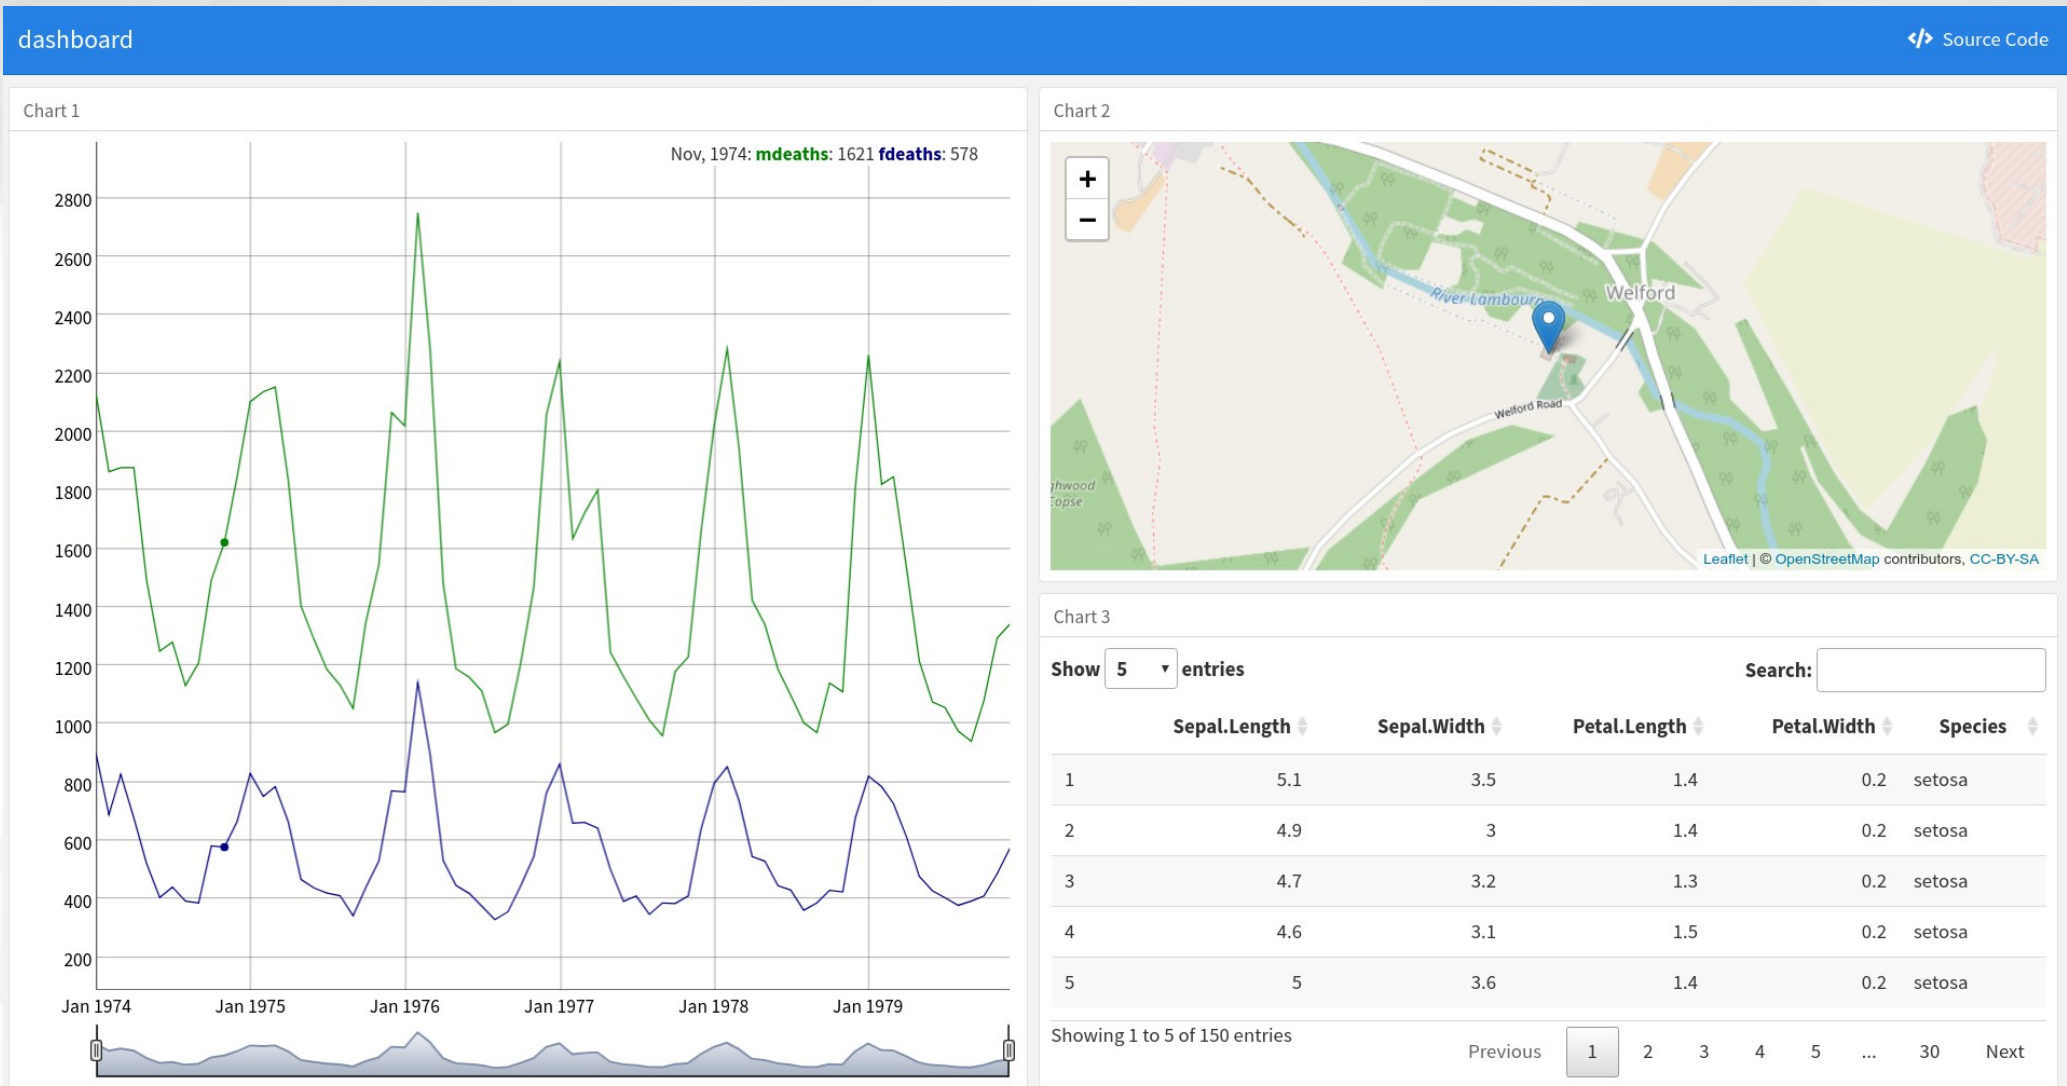

```
`r`
```

```
library(leaflet)
leaflet() %>%
  addTiles() %>%
  addMarkers(lat = 51.4560, lng = -1.4136)
`r`
```

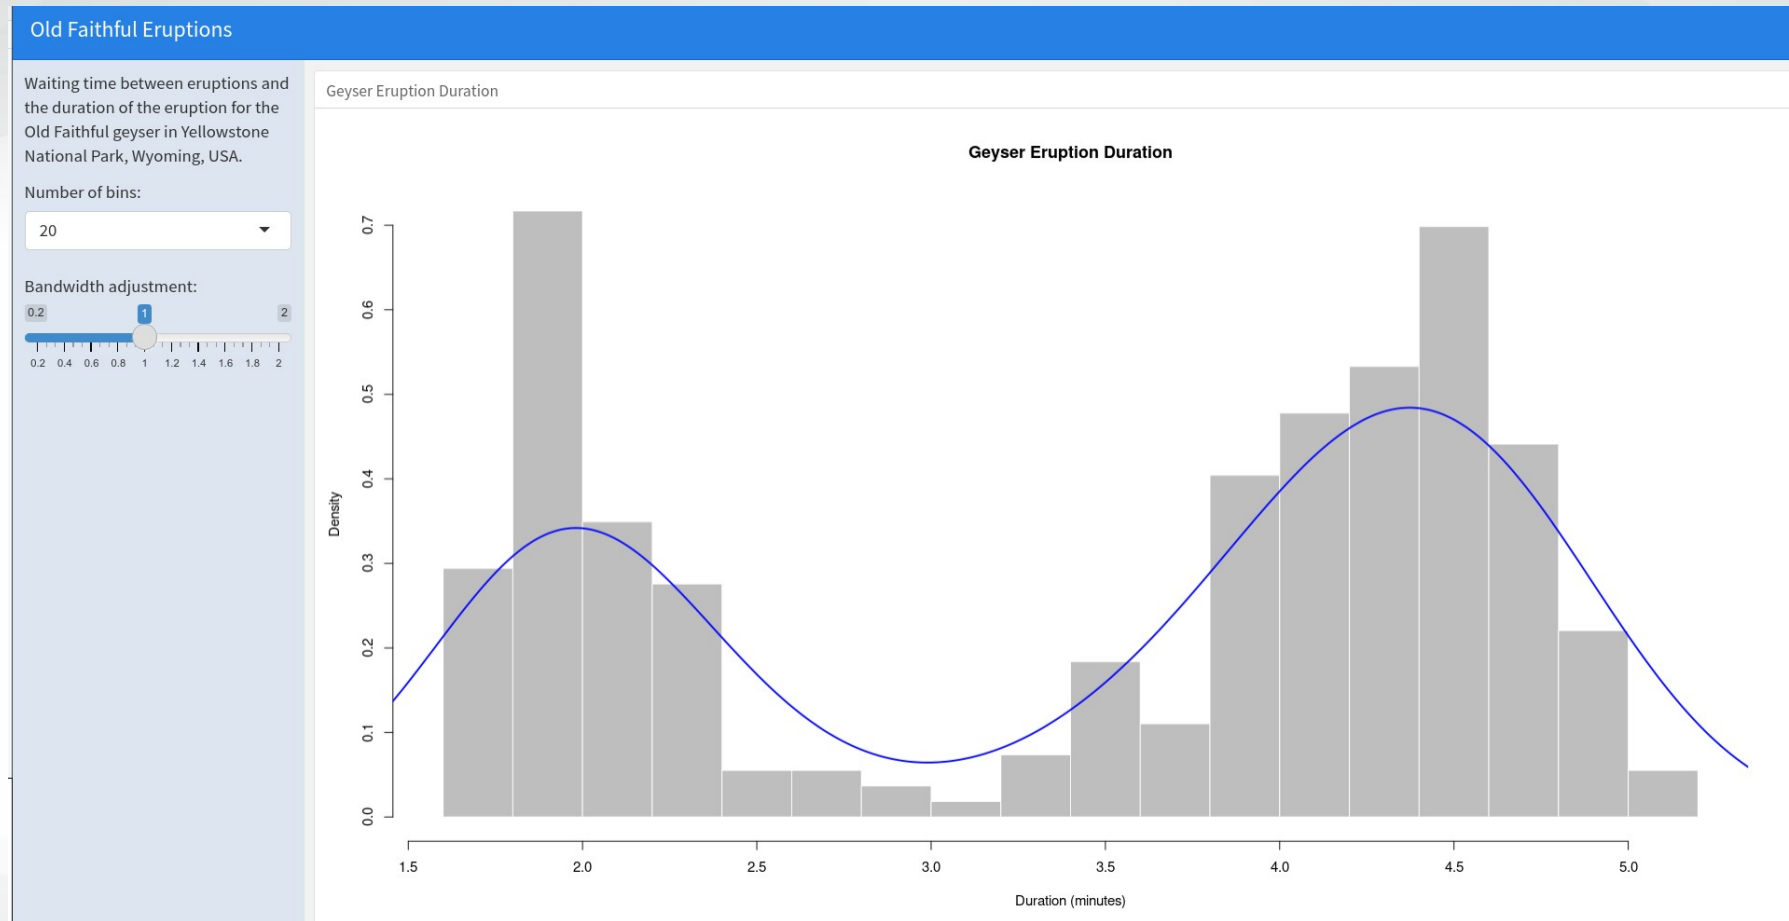

Chart 3

```
`r`
library(DT)
datatable(iris, options = list(pageLength = 5))
`r`
```

V. Interactive dashboards

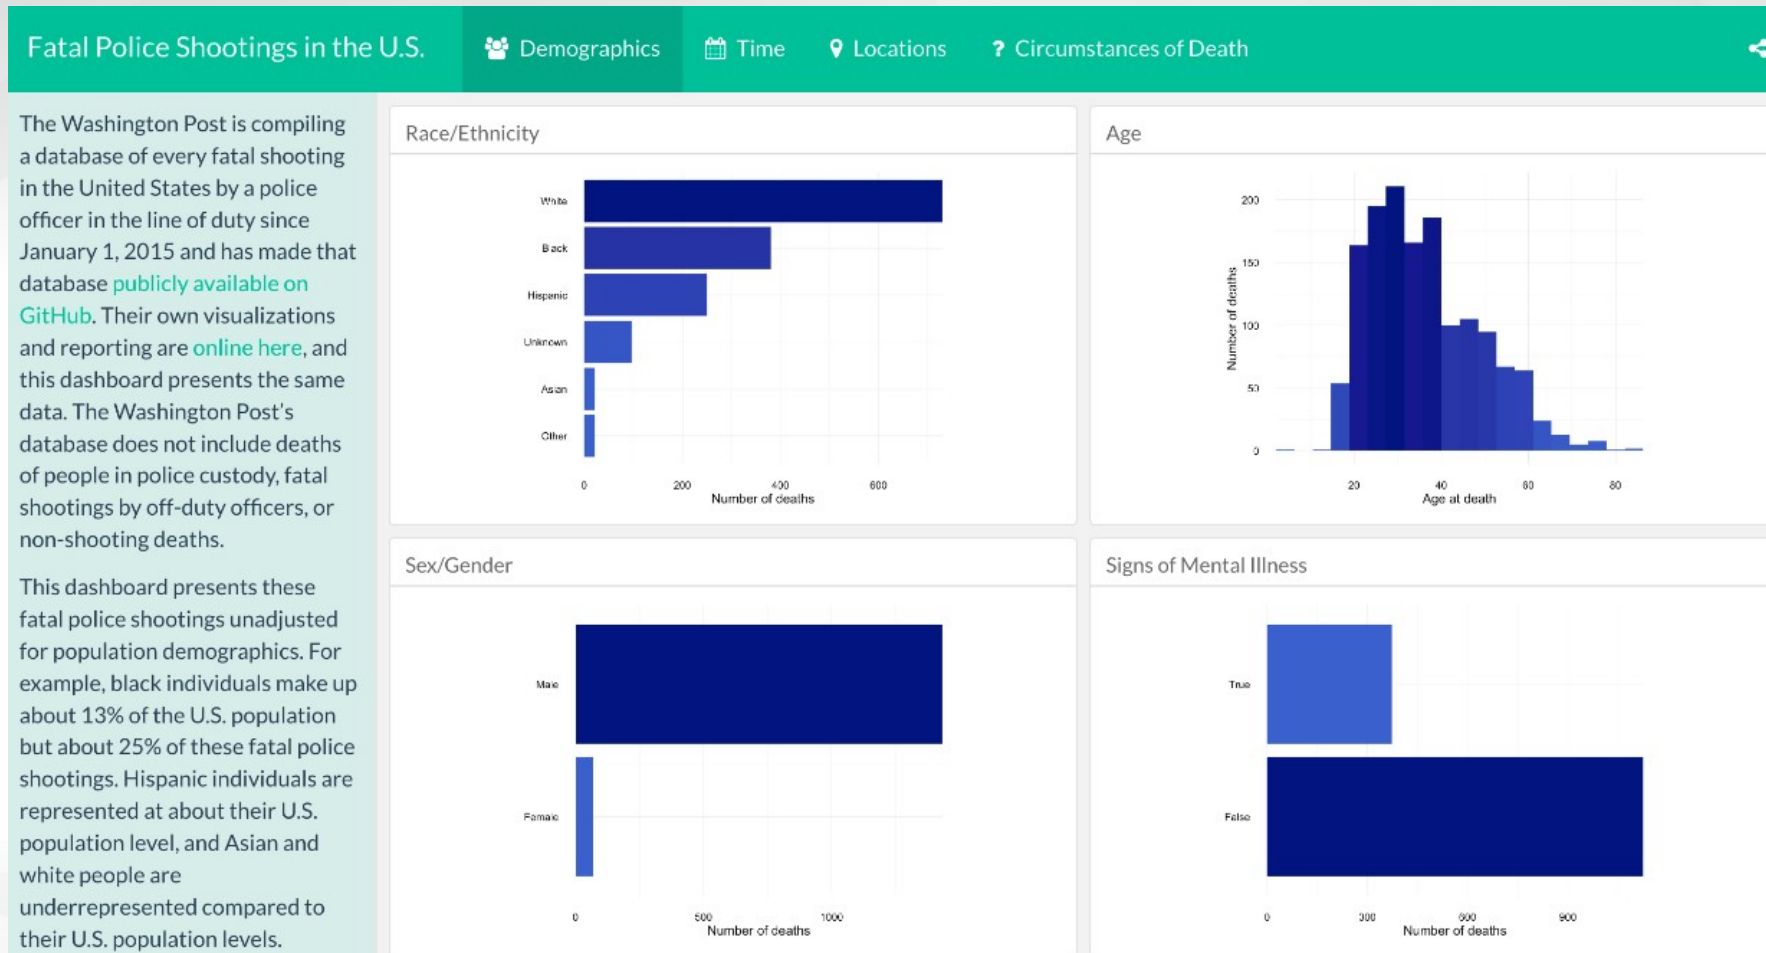

VI. flexdashboard vs. shinydashboard

<https://bookdown.org/yihui/rmarkdown/shiny.html#a-shiny-dashboard-example>

V. Example projects

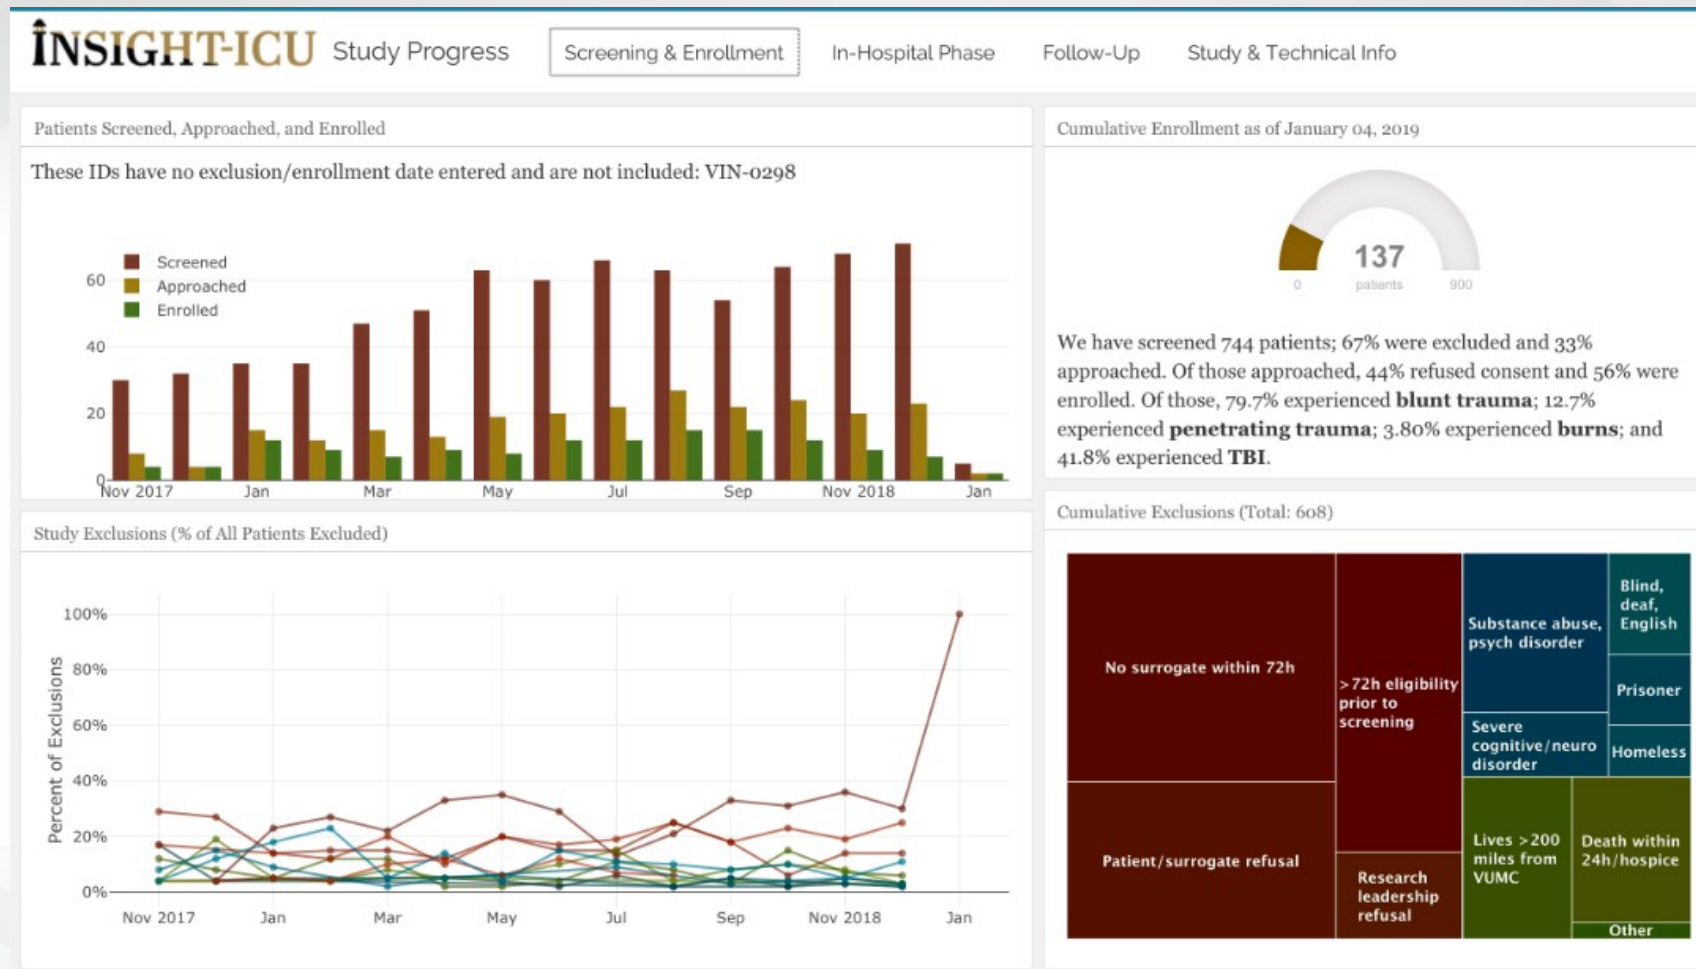

By [Julia Silge](#) ([blog](#); [flexdashboard](#); [source code](#))

V. Example projects
